Contemporary provision of healthcare

The **"Contemporary Healthcare Provision"** initiative is being implemented for the **6th consecutive school year** and aims to inform secondary school students about the different professions in the evolving healthcare sector.

Through **live group sessions with mentors, employees of the Onassis Hospital** representing various specialties, students gain insights into multiple dimensions of healthcare provision and explore the daily professional life within the field.

Specifically, the goals of the initiative are for the students to:

- **explore** career opportunities in the healthcare sector,
- **learn** about the role of technology in modern healthcare,
- **understand** the importance of prevention,
- **discover** the daily realities of working in a hospital and how a unit like that is organized,
- **become familiar with** the legal and ethical aspects of the field.

The initiative is implemented with the support of the **Onassis Hospital** and the contribution of its employees for the **2026-27** school year.
