

Unexplored Futures IV

The initiative “**Unexplored Futures IV**” aims to inform students of High Schools and Vocational High Schools about emerging career paths, while also helping them prepare for their first professional steps. Through live group sessions, participants engage with professionals and gain insight into current career opportunities and day-to-day working conditions in alternative professions.

Employees from Dialectica also actively participate in the initiative. Coming from diverse backgrounds, they have successfully built their career paths and take on the role of mentors, enabling students to:

- explore the modern labour market and the different career paths available to them,
- learn about daily work life in a fast-growing multinational work environment,
- become familiar with the skills needed to meet the evolving demands of today's labor market,
- draw inspiration from their mentors and confidently prepare for their next steps.

The initiative is implemented with the support of **Dialectica** and the active involvement of its employees for the 2025–26 school year.
